

Anker

RK10

In cooperation with a design office, we created the RK10 from the idea to the development to the finished product. Everything from one source - everything „Made in Germany“. ANKER relies on **clean workmanship, high-quality materials** and **modern design**.

The retrofit version allows you to easily use your existing hardware in the RK10. With the **cloud cash register software** from our subsidiary **LocaFox**, the RK10 becomes a **fully-fledged cash register system**. The RK10 comes fully assembled. The optional hardware components are inserted almost **without tools**.

ART.NR.:	DESCRIPTION:
60100.060-0010	RK10S EPSON Retrofit, for Samsung A7 and EPSON TM-m30 series, shiny black, stainless steel bracket, closed front panel with ANKER logo, housing for retrofitting (without tablet / without printer)
